

# Institutional Portion of the Higher Education Emergency Relief Fund Now Available to Colleges and Universities

April 21, 2020

Earlier today, [U.S. Secretary of Education Betsy DeVos](#) announced that the institutional portion of the Higher Education Emergency Relief Fund authorized by the Coronavirus Aid, Relief, and Economic Security (“CARES”) Act is now available for colleges and universities. According to Secretary DeVos, the Department of Education will provide \$6.2 billion to higher education institutions to ensure that learning continues. This funding is separate from the funding that was made available earlier this month for [Emergency Financial Aid Grants to Students](#). According to the Department of Education, so far about 50% of eligible higher education institutions have applied to receive the Emergency Financial Aid Grants to Students, which is a condition for receiving the institutional portion.

Colleges and universities are required to use the institutional portion of the funding to cover any costs associated with significant changes to the delivery of instruction due to the coronavirus (“Recipient Institutional Costs”). Secretary DeVos stated that “the additional funds made available today can be used to expand remote learning programs, build IT capacity, and train faculty and staff to operate in a remote learning environment so that at any moment institutions can pivot quickly. I hope that institutions that already have robust remote learning capacity will consider using this funding to support additional emergency cash grants for students.” The funding for Recipient Institutional Costs cannot be used to pay contractors for the provision of pre-enrollment recruitment activities, including marketing and advertising; endowments; or capital outlays associated with facilities related to athletics, sectarian instruction, or religious worship.

Importantly, Section 4(b) of the Recipient’s Funding [Certification and Agreement for the Institutional Portion of the Higher Education Emergency Relief Fund](#) (“[Funding Certification and Agreement](#)”) expressly states that “it is permissible for Recipient to use the funds for Recipient’s Institutional Costs to reimburse itself for costs related to refunds made to students for housing, food, or other services that Recipient could no longer provide, or for hardware, software, or internet connectivity that Recipient may have purchased on behalf of students or provided to students.”

To access the funding for the Recipient Institutional Costs, colleges and universities must submit the [Funding Certification and Agreement](#) signed by an authorized representative of the institution. The Department has already created a [list of the total allocations](#) to be awarded to each college and university determined using a

formula developed by the Department.

The Department also released two sets of FAQs providing updated guidance about both the [Emergency Financial Aid Grants to Students](#) as well as the [institutional portion](#) of the Higher Education Emergency Relief Fund. The guidance clarifies numerous questions raised by higher education stakeholders regarding the use of both funds.
