
Products Liability

The attorneys on our Products Liability team understand that every product is unique and that successfully defending against defect claims requires a detailed understanding of a product's engineering and the operating environment for which it was designed. We believe that our long history of successful representation in products liability litigation is due in large part to our commitment to gaining a thorough understanding of the products we defend.

State-of-the-Art Products Liability Defense

Our Products Liability team has extensive experience in all aspects of products liability defense. We understand the unique interests of insurance carriers and manufacturers, and we use our vast experience and longstanding relationships with the nation's leading experts to develop strategies designed to protect our clients quickly, discretely and cost-effectively. We use the most-advanced courtroom technology and techniques to defend our clients, and our regular representation of clients in high-stakes construction litigation and defect cases has allowed us to remain at the forefront of state-of-the-art products liability defense.

We represent insurers, designers, manufacturers, distributors, retailers, and other entities in the "chain of distribution" in defense of products liability claims involving all types of products. Our experience includes representing clients in defense of claims involving:

- Agricultural products
- Aluminum bus bars
- Asbestos
- Automobiles
- Breast implants
- Boats and boating equipment
- Chainsaws
- Chairs and stools
- Excavation, construction, and industrial machinery
- Fabric and sleepwear
- Fire extinguishers
